Student Name: Francyn Pe
Group: Group Alpha
Assigned Role: Documentation and System Testing

What did I contribute to the project?
I contributed to the MiniOS Alpha project by helping prepare the project documentation, organizing information about the system, and testing the program to ensure that its features worked properly.

What features did I personally develop?
I worked on the documentation, including the project description, features, system requirements, instructions on how to run the program, and the user manual. I also helped understand and test the available commands in MiniOS.

What problems did I encounter?
I encountered difficulties understanding the program's structure, running the Python files, and identifying the correct commands to execute the system.

How did I solve those problems?
I solved these problems by reviewing the source code, following the setup instructions, testing commands in the Windows Command Prompt, and troubleshooting errors. I also used GitHub to access the project files and manage my contributions.

What did I learn from this project?
I learned how an operating system simulator works, how to run and test Python programs, and how to use GitHub for collaboration. I also improved my documentation, problem-solving, and troubleshooting skills.

Evidence of my contribution:
- Project documentation and user manual checking
- MiniOS running in the Windows Command Prompt
- source code or files I worked on
- GitHub commits or pull requests related to my contributions

## 5. Individual Contribution Reports (`individual-reports/`) (§25)

Each team member must submit a PDF (`individual-reports/<name_or_student_id>.pdf`) answering:

- [ x] Student Name, Group Name, Assigned Role (§17-18)
- [ x] What did I contribute to the project?
- [ x] What features did I personally develop?
- [ x] What problems did I encounter?
- [ x] How did I solve those problems?
- [ x] What did I learn from this project?
- [ x] Evidence of my contribution (commits, screenshots, code references)

## 6. Demonstration Video (§26-28)

- [ ] **Recording Length:** 5 to 10 minutes
- [ ] **Live Demonstration Sequence:**
  1. Start MiniOS (`python main.py`)
  2. Login demonstration
  3. Help command (`help`)
  4. File Management (`dir`, `mkdir`, `create`, `read`, `delete`)
  5. Process Management (`run`, `process`, `kill`)
  6. Memory Management (`memory`, `allocate`, `free`)
  7. User & System Information (`whoami`, `systeminfo`)
  8. Error Handling (show response to invalid commands/inputs)
  9. Exit (`exit`)
- [ ] **Team Presentation Requirement (§27):** Every member introduces themselves and briefly explains their assigned portion.
- [ ] **Hosting Platform (§28):** Upload to YouTube (Unlisted), Google Drive, or OneDrive with public/instructor viewing access verified.

## 7. Git & Canvas Submission Checklist (§20, §29-30)

- [x] Local Git repository initialized on `main` branch.
```

```
PS C:\Users\Francyn\Downloads\minios-alpha> git push -origin franz
and the repository exists.
PS C:\Users\Francyn\Downloads\minios-alpha> git push --set-upstream origin franz

Jhetro Jade created the group chat.

Matthew Garfin Sto Tomas added you to the group.

Jhetro Jade named the group GROUP ALPHA.

Oct 9, 2026, 8:05 PM

Good evening **@everyone**!

so for our project i'll be arranging files nlng in my github and for coding sino want mag volunteer?

CLI Developer
File Management Developer
User/System Developer

Kyle Patrick
visual studio ta ni? or vs code?

MiniOS Alpha
Programming Language: Python (run through windows CMD)

Features (19 Commands):

Help Command	help, clear, date, time, whoami, dir, mkdir, create, read, delete, process, run, kill, memory, allocate, free, systeminfo, exit
File Management	Dir, mkdir, create, read, delete
Process Management	Process, run, kill
Memory Management	memory allocate free
User Management	Admin, student, users, login ,logout
System Information	systeminfo
Error Handling	exit
Exit Command
